### ACTIVITY DESCRIPTION AND OBJECTIVES

The College of Engineering and Technology (CEAT), through its different Student Councils and the Lasallian Community Development Center (LCDC), decided to adopt Barangay Tua in Magallanes, Cavite as their target beneficiary of their different outreach program activities and projects.

The Mechanical Engineering students, under the supervision of Engr. Wilfredo Vidal, have decided to do/conduct a research on livelihood and environment. Two (2) groups volunteered to do the said researches and they will be preparing chapters 1-3 as academic requirement. The said students are expected to finish their researches. After which, they are expected to submit a copy of the research result to the said community, as well as to LCDC.

### SUMMARY:

- The said orientation started at 1:15 p.m.
- **Attendance:**
  - I-Mechanical Engineering (MEE) 5-1 Students:
    - 1.1. Kevin M. Mejos
    - 1.2. Kimberly L. Isidro
    - 1.3. Julius Panaligan
    - 1.4. Williard Mata
    - 1.5. Jhojo T. Derain
    - 1.6. Toshi John B. Sugahara
    - 1.7. Christopher Laurence S. Santos
  - Focus of research: Livelihood
  - Focus of research: Environment

- II - LCDC Faculty:
  - 2.1. Ms. Iris Andaya
  - 2.2. Ms. Jeannifer Claveria

- **Process:**
  - The said orientation started by introducing each member of the group, as well as the LCDC faculty.
  - Ms. Claveria was the one who preside the said orientation.
  - Students were asked of the following questions:
    - What are their expectations in their request ocular visit on the said community on September 15, 2014?
    - What is the group’s main objective/s in conducting their focus research?
    - Ms. Andaya, re-iterate to the students some of the important points to consider in conducting their research, as well as the Standard Operating Procedures (SOP’s) in conducting an ocular visit in a particular partner community.
  - Each group are expected to submit to Ms. Claveria (through email) the following requirements on or before September 15, 2014:
    - Timeline of each group's focus research or topic.
    - Questionnaire/s
Ms. Claveria will send the necessary data needed by each group for their research by an email.
It was suggested that representative of each group will have a close coordination with Ms. Claveria regarding details on their request ocular visit.
The orientation ended by 2:45 p.m.

INSIGHTS/ LESSONS LEARNED:
- Punctually of students.
- There was a sign of positive response coming from the students who have an initial exposure on the said community.
- The flow of discussion was light and fluid.

Note : No Photo Documentation (Brief Orientation Only)
