# Data Gathering for Research Study entitled Proposed Design of Sustainable Water Supply System

**DATE:** January 19, 2015  
**VENUE:** Brgy. Tua, Magallanes, Cavite

**PROJECT/ACTIVITY HOLDER:**  
ESE 15

**BENEFICIARY:**  
Student, teachers and staff of Tua Elementary School

**TYPE OF PROJECT:**  
Data Gathering

**TOTAL ACTIVITY COST:**  
c/o ESE 15

## SUMMARY:

1. The ESE1-5 students gave courtesy to the officer in charge of Tua Elementary School. They explained that the purpose of visit is to gather information/data needed for their research paper.
2. They conducted short interview to find out the following information: number of comfort rooms, total population of the students starting 2005 up to present.
3. The students also conducted inspection of the comfort rooms. They noted the specification of each comfort room.
4. The students measured the distance and elevation of water supply source from Tua Elementary School.
5. The group also surveyed the area for other possible source of water for Tua Elementary School.
6. The students collected water sample from the water supply source of the school (water tank located at Sitio Ilaya), and from the small spring also located at Sitio Ilaya.
