

# Why does DLSU-D High School implement the online learning mode during the quarantine period?

Aside from continuously providing quality education, DLSU-D High School sees the quarantine period as an opportunity to teach its students three valuable work skills that prepare them to the online world.

**1**

## SELF-MOTIVATION

Students need to set deadlines for themselves to accomplish the goals set out by each subject.

**2**

## TECHNOLOGY LITERACY

Students should develop familiarity with technology that will best prepare them to technology use at the workplace.

**3**

## SELF-DISCIPLINE

Students must learn how to succeed without outside motivation, and they must find it within themselves as they get online and do assigned/scheduled tasks without anyone watching them.
